

Hartford County Fire Emergency Plan

Fire Coordinator Information

CT Statewide Fire/Rescue Disaster Plan

According to the Connecticut Fire Service, Fire-Rescue Disaster Plan, the state is divided into five large regions for the purposes of fire service coordination (see figure). Each of the five regions has a designated a Regional Fire Coordinator, tasked with facilitating responses within the region. Further, the plan designates a County Fire Coordinator for each of the 8 Connecticut counties who work at the sub-regional level in support of the Regional Fire Coordinator. Disaster response, on the state-wide level, is overseen by the State Fire Administrator, who is responsible for leading Emergency Support Functions for Firefighting at the State Emergency Operations Center (EOC).

What Does a County Coordinator Do?

Fire Coordinators are there to be a resource for the incident commander (IC) and help facilitate requests for resources and tools they need for the operation at hand. Fire coordinators represent the county, regional and state fire plans, but are NOT there to take charge of a scene or make decisions for the IC.

Coordinator Qualifications

All Hartford County Coordinators have at least 10 years of fire service experience and are trained to at least ICS-300. These coordinators are appointed by the Hartford County Fire Emergency Plan Executive Board.
